

Brainstorming & Idea Prioritization Template

Date	27 June 2026
Team ID	XXXXXX
Project Name	Raising water's
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Dinesh Allu (Member)	Develop flood prediction using historical weather data and ML algorithms	Prediction Model	1
2	Bhargavi Dungala (Team Lead)	Build a user-friendly Flask web application for authorities	Application Development	2
3	Sk Farhan Raza (Member)	Compare multiple ML models (Decision Tree, Random Forest, KNN, XGBoost)	Model Evaluation	1
4	Sudhir Kumar (Member)	Add early warning and evacuation support functionality	Disaster Management	3
5	Suraj Badada (Member)	Deploy application on IBM Cloud for scalability	Deployment	2

Step 2: Idea Prioritization

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)

1	Build and compare ML models for flood prediction and select best model (XGBoost)	High	High	Yes	Yes
2	Develop Flask web application and deploy on IBM Cloud	High	High	Yes	Yes
3	Integrate early warning support for disaster response	Medium	High	Yes	Yes

Final Selected Idea:

Develop a Machine Learning-Based Flood Prediction and Early Warning System using weather data, integrate the best-performing model (XGBoost – 96.55% accuracy) into a Flask web application, and prepare for IBM Cloud deployment to support authorities in disaster management and flood preparedness.
