

Demonstration of Proposed Features

Date	02 June 2026
Team ID	XXXXXX
Project Name	Raising waters
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Weather Data Input	Users can enter rainfall, cloud visibility, and other weather parameters through the web interface.	Implemented	Yes	Successfully demonstrated using the Flask application.
2	Data Preprocessing	Cleans and prepares weather data before prediction.	Implemented	Yes	Data preprocessing works correctly with the trained model.
3	Flood Prediction Model	Predicts flood risk using Decision Tree, Random Forest, KNN, and XGBoost algorithms.	Implemented	Yes	XGBoost achieved 96.55% accuracy and was selected as the final model.
4	Prediction Result Display	Displays flood prediction instantly on the web page.	Implemented	Yes	Prediction results are generated successfully after user input.
5	Flask Web Application	Provides a user-friendly interface for prediction.	Implemented	Yes	Application runs successfully on the local Flask server.
6	IBM Cloud Deployment	Deploys the application for online access.	Implemented	Yes	Planned for IBM Cloud deployment as the final stage of the project.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
